Flat-tip screwdriver

Diagonal cutters

Blanket

String

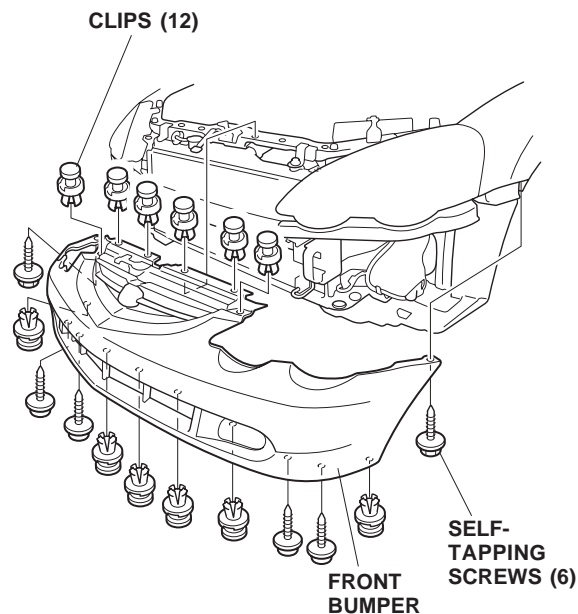

INSTALLATION

NOTE:

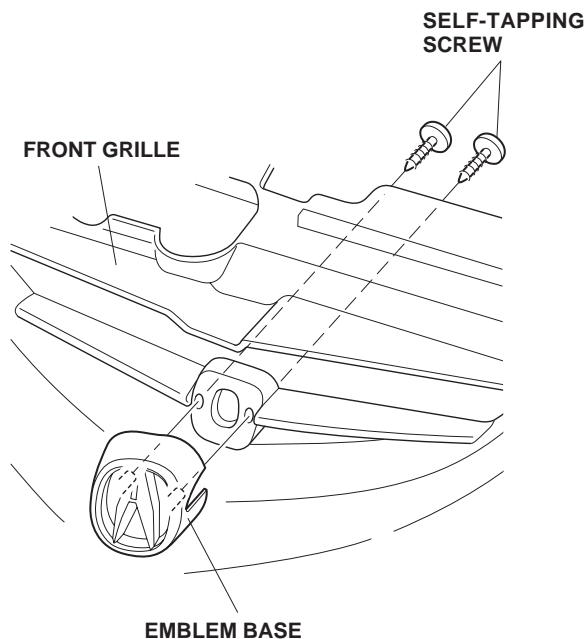

- Be careful not to damage the body paint finish, bumpers, bumper grilles, etc.
- This gold emblem kit should only be installed if the ambient air temperature is 60°F (15°C) or above.
- To allow the adhesive to "cure," do not wash the car for 24 hours.

Installing the Front "A" Emblem

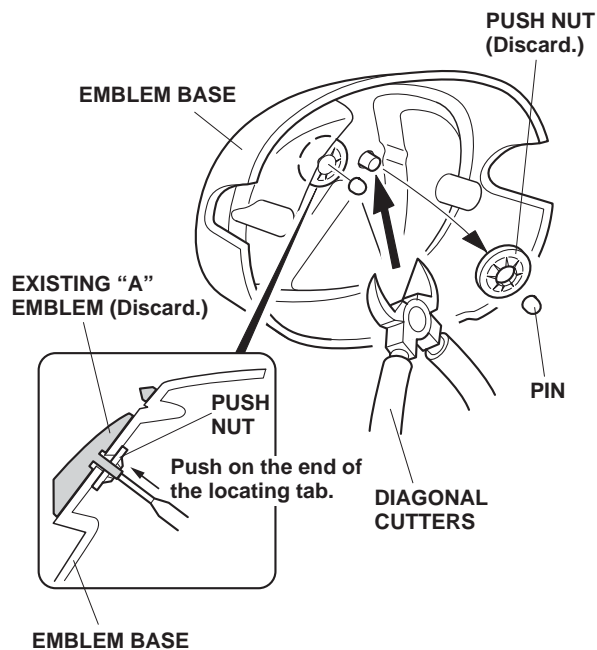

1. Open the hood, and remove the front bumper (12 bumper clips and six self-tapping screws). To prevent damage to the front bumper, place it on a blanket.

2. Inside the engine compartment, remove the two self-tapping screws securing the emblem base to the front grille, and remove the emblem base.

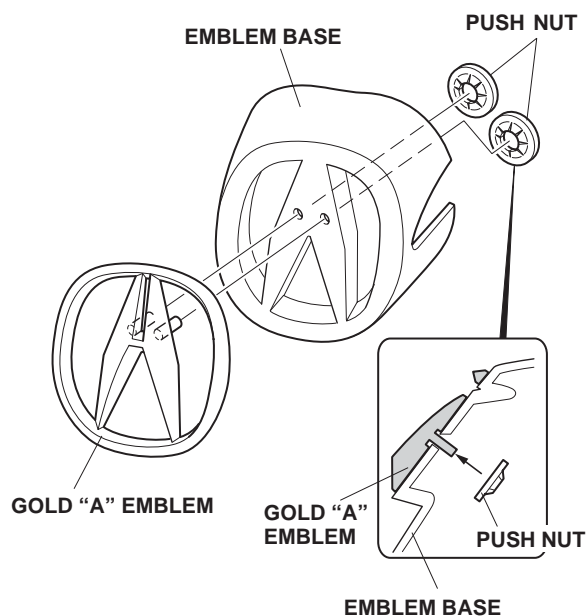

3. Using diagonal cutters, cut the locating tabs from the existing front "A" emblem. Push the locating tabs to remove the emblem from the emblem base.

4. Using isopropyl on a shop towel, clean the area where the emblem was removed.

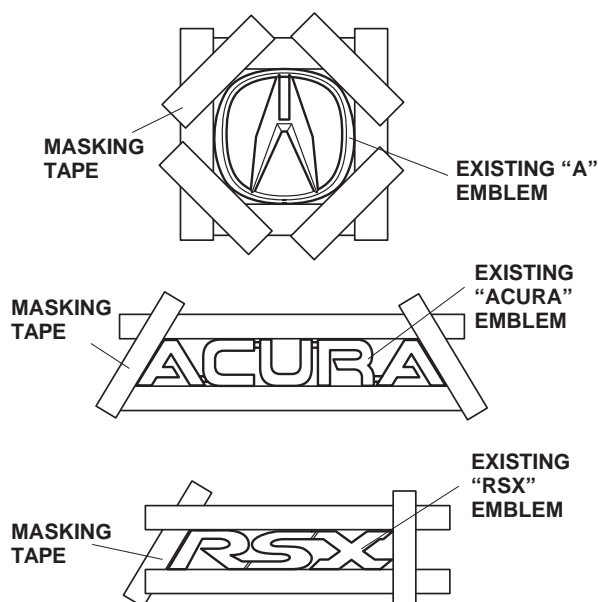

5. Install the gold "A" emblem on the emblem base by inserting the two locating tabs into the holes in the emblem base. Push the new push nuts onto the locating tabs. Note the installation direction of the push nuts.

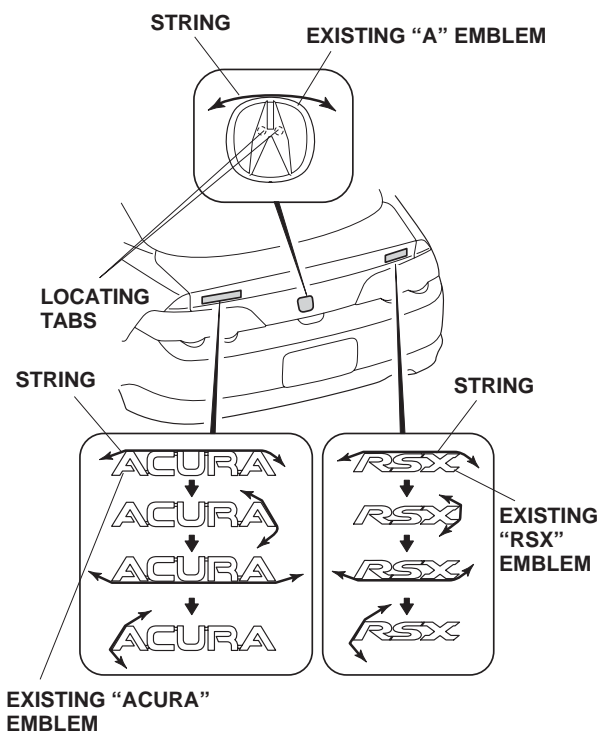

6. Reinstall the emblem base and front bumper. Check that all clips are installed securely without play or lifting.

Installing the Rear Gold "A," "ACURA," and "RSX" Emblems

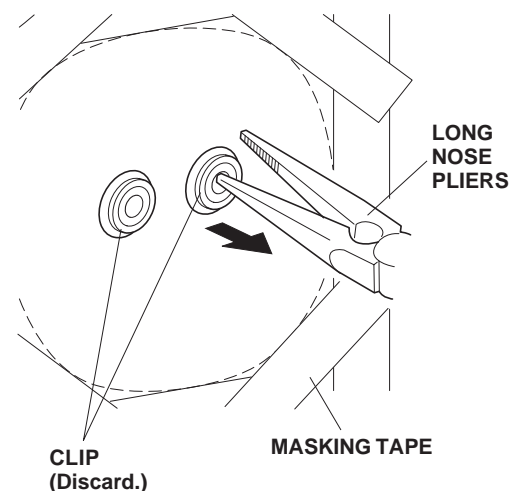

7. Mark the locations of the existing emblems, using masking tape.

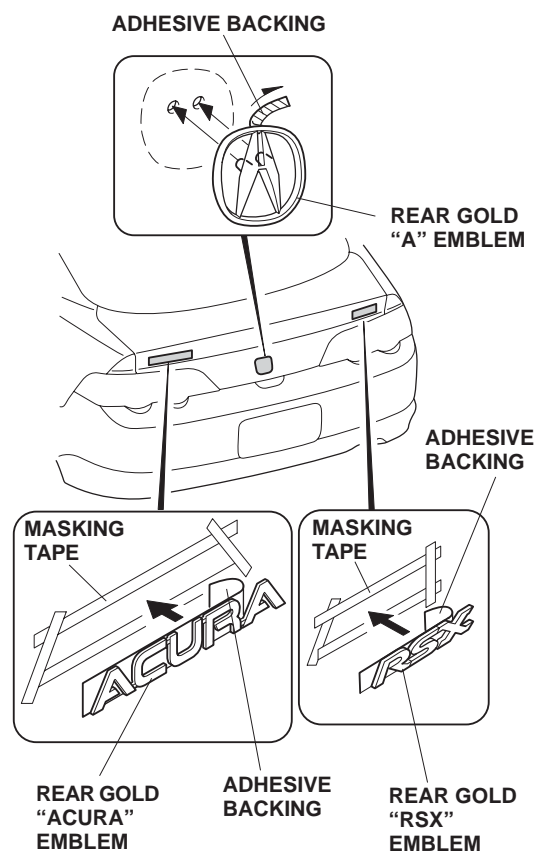

8. Using string, remove the emblems from the body by moving the string in the directions shown. Note the locating tabs of the emblems when moving the string.

9. Remove the two clips from the body. Be careful not to damage the body.

10. Using isopropyl alcohol on a shop towel, clean the areas where the emblems were removed.
11. Remove the adhesive backings from the gold "A," "ACURA," and "RSX" emblems, and attach them to the marked areas. Hold the emblems firmly against the body with the palm of your hand for 30 seconds.

12. Remove the masking tape.
